

Directions to instructor: break into 3 groups to answer an assigned question on chart paper and then share with the class. OR if more time, use chart paper to draw the answers to 1 and 2 and 3rd group can act out 3!!

Internal Bleeding (p260-261)

Internal bleeding is an assessment concern as you cannot “see” it and it can cause serious problems with the injured person. Your knowledge of MOI or NOI plus observing S/S will give you the information you need to recognize this concern.

1 .List some MOI (mechanism of injury) and NOI (nature of illness) that can cause internal bleeding:

2. What will be the signs and symptoms of internal bleeding:

3. Since controlling internal bleeding usually requires surgery—what will you do in caring for the injured person?
